

Advanced Supply Chain Software™

for Microsoft Dynamics®

ADVANCED PROCUREMENT MANAGEMENT™

➤ MAXIMIZE YOUR DISCOUNTS

As a distributor, you buy your products from someone who manufactures the product. You have an array of agreements associated with the procurement process and have to keep in mind Left to Qualify as well as LTL Containers or Full Truckload Containers along the way. If you aren't fully managing this process, and if it's not automated, you are likely leaving money on the table as well as dealing with vendor and customer satisfaction issues

Keep important agreement information at your fingertips with **Advanced Procurement Management™** a software solution that is a part of the Advanced Supply Chain Software™ suite for Microsoft Dynamics® AX, powered by I.B.I.S., Inc. **Advanced Procurement Management™** keeps all your important data in one place so you can take advantage of discounts, time frames, etc. Maximize your discounts, and have the right data to negotiate your vendor discounts.

ABOUT ADVANCED SUPPLY CHAIN SOFTWARE™

for Microsoft Dynamics® AX

Advanced Supply Chain Software™ for Microsoft Dynamics® AX offers distributors so much more than applications that manage a single aspect of your supply chain. You get comprehensive end-to-end advanced supply chain functionality built by industry experts to address the full depth and breadth of your supply chain needs. Improve supply chain velocity, exceed customer expectations and optimize your profitability – all with industry proven software.

Advanced Sales and Operations Planning™

Advanced Order Management™

Advanced Revenue Management™

Advanced Inventory Management™

Advanced Demand Planning™

Advanced CRM for Distributors™

Advanced Business Analytics™

Advanced Landed Costs

Obtain a true understanding of the real cost for your products. Landed costs are calculated based on an estimate originally, and actuals as they are available. The real costs will be captured by vessel, container, purchase order and line item quantity.

Advanced Pricing for Purchases

Tiered discounts and purchase pricing based on amount and weight. Also includes left to qualify to ensure you purchase at the best negotiated price.

Buyer's Console for Intelligent Purchase Requirement Consolidation

Effectively consolidate plan to purchase requirements – from your MRP calculations or manually created and can be modified by automatic EOQ or minimum order points calculations - based on vendor minimums, and price break thresholds.

RFQs Integrated with Sales Quote to Order Processes

Perform sourcing activity from sales and automated RFQ acceptance upon successfully winning the quote.

Master Catalog for Non-Stock Items

Generic repository for all vendor catalogs that can be used to release new products or update existing products and pricing from primary or alternate.

Create Items on the Fly During Quote to Order Process

Search master catalog for vendor items or add new products to the catalog but only release and create the product in the item master upon conversion of quote to sales order.

Advanced Procurement Management™ has all the capabilities you need to fully and intelligently manage procurement. Keep discount and negotiation information your fingertips so you can get the best price for your organization. Stop overlooking key processes and strategies and ultimately leaving money on the table. Improve your procurement process driving your total profitability with **Advanced Procurement Management™** from I.B.I.S.

Microsoft Dynamics® Strategic Development Partner

I.B.I.S., Inc., a Sonata Software Company, is a member of the elite Microsoft Dynamics® Strategic Development Partner program, an honor reserved for those Partners who have demonstrated deep industry and functional expertise.
